

Lenovo recommends Windows 11

Thrive in a hybrid future with Lenovo PCs ready for Windows 11

Next-level security, manageability, and performance

An improved UI is just the start. Hybrid is the future of work, but the flexible workplace can be a big challenge for IT teams. Lenovo's PCs are ready for Windows 11, keeping your people productive in a work-from-anywhere world with comprehensive built-in security, business-grade tools, and consistent management.

FEEDBACK

Prepare with our Upgrade Reference Guide

Help your IT team plan for Windows 11 so employee devices are always up to date, always ready

This go-to guide answers key questions like...

- Why, how, and when to upgrade?
- Which devices are compatible?
- How can IT teams plan ahead?

A premium PC experience

ThinkPad® X1 innovations bolster Windows 11's best features

Secure

Stay ahead of sophisticated cyberattacks with powerful built-in security, integrated hardware, and OS safeguards including Secure Wipe 2.0, Firmware Resiliency 2.0, and Human Presence Detection.

Serviceable

Designed to help IT secure data before servicing, intelligent PC diagnostics allow a technician to work with increased precision and accuracy.

Reliable

Our Always On/Always Connected feature, newly engineered 5G and Wi-Fi 6 antennas, and smart battery management optimize day-to-day productivity while improving long-term performance.

Personal

The X1 family has a premium device for every work style, in every workforce, all backed by the ThinkPad promise of quality, innovation, and design.

For all the ways you work

Lenovo Think® products running Windows 11 provide powerful device management, unmatched security, and experiences that empower users to get the job done every day.
